Allowable Subject Matter

1. Claims 1-7, 14-20 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims 1-7, 14-20 in accordance to the office action dated 05/20/04. Claims 8-13 have been cancelled. Upon further consideration, claims 1-7, 14-20 are allowed. The present invention relates to method and apparatus for spreading a signal. Prior art of record, taken individually or collectively, fails to fairly teach an improved spreading system and method, which utilizes fewer multiplications, including "receiving an assigned spreading factor for the data signal; a processor for defining a group of symbols for spreading based upon said assigned spreading factor; an intermediate code generator for computing a spreading code based upon said assigned spreading factor and at least one code from a plurality of real codes derived from said plurality of assigned spreading codes, said intermediate code generator outputting an intermediate code; and a rotator for performing a phase rotation of each symbol in said group to generate a complex quantity, said complex quantity being spread with said intermediate code and output as a spread data signal" in independent claim 1 and similarly in independent claim 14 (claims 2-7 and 15-20 depend therefrom). Thus, claims 1-7, 14-20 are found to be novel and unobvious over prior art of record.
